

Guidance

The Zynx Guidance system is now considered the bench mark in the tough guidance market. Value for money, performance, functionality and capability to expand into all areas of farm production gives Zynx the edge on its competitors, as a multi task controller with the ability to become a seed rate, spray rate and spreader rate controller all with the added ability to automatically turn on and off application of the above controllers, Zynx leaves competitors in its wake.

Not only a guidance unit, Zynx is a console taking GPS technology to a new level, by thinking outside the square. KEE Technologies Zynx offers upgradeability, flexibility and simplicity unmatched in the market place.

Zynx capability extends into parallel, racetrack and contour guidance, by combining a moving map, virtual road and position locator the operator has all the information required to complete any task with ease.

Zynx capability extends into parallel, racetrack and contour guidance

Compatible with GPS and DGPS receivers Zynx offers accuracy from entry-level autonomous GPS signal, through to free to air marine beacon and OmniSTAR subscription DGPS accuracy.

Upgrade your Zynx guidance system at any time with a KEE Technologies Auto Steer kit and own one of the most capable steering systems on the market. Again add to this any of the rate controllers available to complete the package and one console does the lot.

The virtual road is now accepted as the best way of perceiving distance and tackling corners with ease, moving map offers location of the vehicle and identifies areas requiring attention and the position locator offers a lightbar style of assistance to make corrections simple and quick.

The farmer can also flag points of interest and return at a later date to correct or inspect area, save application maps with information about completed jobs and then transfer that information onto home PC with the thumb drive supplied for record keeping with ease. Unlimited field savings and printed map reports complete the data package and give you, the owner, confidence of a job well done.

A colour touch screen makes inputting data a simple procedure, five screen colours lets you customize the background to suit operating conditions and the ease of mounting the console offers many options in regards to cab installation.

**ZYNX IS ONE UNIVERSAL CONSOLE
capable of world leading performance.**
