To reserve or to inquire about equipment availability, call Rust Sales, Inc. and ask for Ray or Rick

Common Questions Regarding Our Scrapers And Lasers

How many hydraulic outlets do the Ashland and Toreq Scraper and AGL Lasers require? Three, the scraper needs two and the laser hydraulic mast needs one. One additional outlet is required for an Automatic Laser System (Four Total for Automatic)

Is the AGL or Topcon Laser systems hard to understand and use?

We don't think so. You need to determine the proper grade to dial into the laser, which is obtained by a simple survey of the ditch. Our Stabilaser Trailer has a great Grade Calculator Decal to assist you in determining the grade

Do I have to walk the entire ditch to survey it at 100' stations? No.

The hydraulic masts have a 60 or 72 inch stroke with foot and tenths grade markings. This allows you to survey the ditch from the comfort of your tractor.

If I rent a Laser System are there any attachments I need to buy?

Yes, if you are not renting our scraper with a laser you will need to buy a hydraulic mast mount and support receivers that are welded to your scraper. Its cost is \$48.00

Is there a way to find out if I have the laser set-up properly before I move yards of dirt? Yes, after you have set the ditch depth and grade,

you simply drive the length of the ditch to its opposite end. If every thing is set-up properly the scraper will show an **ON GRADE GREEN LIGHT** with the blade set on the ground at the final survey point.

If I first rent a laser unit, will the rent apply to the purchase? Yes and

No, we need to know ahead of time that you are interested in a rent/purchase agreement. Some Units are not for sale. This way we get you equipment that is for sale and you will know exactly what the cost of purchase is before the rent even starts.

Rental Terms and Conditons

Due to the seasonal demand of scraper and laser systems, rental is subject to the availability of the equipment. All rental equipment is subject to the terms specified in the rental contract as supplied by Rust Sales, Inc. The renter must specify the amount of rental time at the time of rental. Payment is due when the equipment is received by the renter. Rust Sales, Inc must approve additional rental days. If the renter is unable to use the equipment, it is their sol responsibility to return the equipment immediatly, at which time they will be eligible to receive a refund for the unused rental days. Renters will not be subject to rental fees for approved travel time to and from Rust Sales, Inc. Any conditions which prevent the use of the equipment must be reported to Rust Sales, Inc. immediatly and approved by Rust Sales, Inc. in order to receive an extension of rental time; otherwise charges will be applied for the additional days. It is the responsibility of the renter to return equipment in the same condition and appearance as it was when received.

Scrapers that have excessive mud and dirt must be cleaned and washed off by the renter. Scrapers not cleaned and washed will be subject to a clean-up fee to be charged at Rust Sales, Inc. shop labor charge. Scrapers must be greased daily. Rust Sales, Inc. must approve any repairs. Delivery and pickup of equipment is available at an additional charge.
